Areas for development
Most pupils stated that they were happy at school, although two classes were identified to have significantly lower data than other secondary classes.

66% of pupils in these 2 classes said “Our school is fun and exciting”

81% of pupils in these 2 classes said “Behaviour is good at school, and poor behaviour is dealt with quickly”

Comments/Actions

From looking at the secondary data we have identified two classes with significantly lower scores than the rest, so we will be working closely with these classes to rectify any issues the pupils have.

On the rare occasions where pupils experience disagreements with their peers, appropriate support is put in place (eg Pupil Support Team)

Follow up actions:

From speaking to the two secondary classes who gave lower scores, we have identified that when the surveys were taken compared to the other classes, incidents with other pupils had arisen prior to pupils completing the survey and inconsistent staffing at the time of the survey.
